

**Transcript of words spoken on RSCC glove drive video return
from Cocody Hosp., Cote d'Ivoire**

Bonjour,

Gloves are an important piece of equipment for medical staff.

Since Covid 19, and the increase of hemorrhagic fever such as Ebola fever and Dengue fever we used a lot of gloves. Our daily need for gloves is ten times maybe more for now.

The gloves that you sent to us via Mrs. Silue, via Rockville Sister Cities, have arrived. We will make sure that these gloves are sent to the department that are the most in need such as Neurology, Gynecology, chirurgic etc.

Thank you so much for what you did. We hope to have more gloves in the future.

God Bless you all.
